COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

WASHINGTON, DC 20510-6175

BETTINA POIRIER, MAJORITY STAFF DIRECTOR
RUTH VAN MARK, MINORITY STAFF DIRECTOR

May 15, 2012

Theodore F. Craver Jr.
Chairman, President and Chief Executive Officer
Edison International
555 12th Street, NW
Washington, DC 20004

Dear Mr. Craver:

I write to request that Edison International provide me with documents related to the San Onofre nuclear power plant's redesigned steam generators. On January 31, 2012, the facility shut down a reactor because radioactive water leaked from tubes in one of the redesigned steam generators. Concerns have been raised that design changes in the steam generators contributed to accelerated wear in tubes carrying radioactive water.

The determination to restart the San Onofre reactors must ensure the safety of the millions of Californians who live and work near the plant. Please provide all documents related to Edison's determination of whether a license amendment was required for the replacement of the steam generators. I ask that you deliver all documents to my Committee office by May 21, 2012. Contact Terrance Horner or Grant Cope (202/224-8832) with any questions.

Sincerely,

Barbara Boxer
Chairman
